To Michigan Supreme Court Clerk:
I am writing in regarding the proposed court rule No. 2003-47, to deny myself and other working class people the right to trial by jury. I feel hard working people should have right to jury trials. Hard working people should have a voice in their lawsuits, instead of corporation or certain conservator who has never work in a factory before. Hard worker has a right to a fair trial by jury, because this is fair to those with injury due to asbestos.
