In regards to MSC "Court Rule No. 2003-47"

Has the constitution of Michigan and the United States of America been changed? Are the Judges of the Michigan Supreme Courts now in the position of changing or even designating laws without the voices of the American people? I for one hope not.

Every citizen of the United States should have the right to have their cases tried in the courts by a jury. After all is said and done, the asbestos companies profited by their wares, knowing there was a high risk, (almost a promise), of a nasty and avoidable death. Had the people who used the asbestoes products been informed of the dangers, in doing so, then the responsibility would have fallen on their own decision. I am sure many would have avoided asbestos usage.

RECEIVED
NOV 17 2003
CORBIN DAVIS
CLERK SUPREME COURT

It's time now for the corporations to take responsibility for their actions.

Against MSC Court Rule No. 2003-47.
