CORBIN DAVIS
CLERK SUPREME COURT

Oct. 29-200

Dear Sir,

I'm writing to you about court rule # 2003 47. I feel it isn't right to the business that cause my husband death, do to the asbestos illness. The company made material that kill people and get lots of money for that.

Other people shoot other people or poison them, they go to jail or they go to prison, get the death penalty But the big company can kill other human beings and get away with it. There's some thing wrong with this picture. Do you think its alright for these big company to kill our loved ones and it's okay-No

The real crisis in Michigan is the failure of corporations to take responsibil for their bad actions, and the willingn of big business and certain conservation republican judges to blame the victims of corporate misconduct instead of holding the corporations accountable.

You people maybe walking on or in buildings that my husband helped

buried not knowing that the big company that made the material was killing him little by little

We had plans when he retired but they were taking away from us. Now I live alone, Not a very good life - Lonely long days and nights.

I worked at a hospital for 21 years where there was asbestos, who's to say I don't have lung cancer from it - what are the true facts about asbestos litigation in Michigan? In fact in the last four years, there has been one asbestos case tried to verdict in the entire state of Michigan.

all other cases were settled before trail. These cases shouldn't have to go to trail. They (the companys) know their guilty of taking our love ones from us. And taking my sons father from them.

I wonder if any of these people have trouble sleeping like I do?

Thank you

Carey Prince
