Supreme Court Clerk
P.O.Box 30052
Lansing, MI. 48909

Dear Supreme Court Administrators,

This correspondence is in regards to ADM File NO. 2003-04. As I have reviewed the proposed changes in MCR. 6.500 and its rules of procedure, I am in disagreement with a few of the changes because it appears if the changes are implemented they will make it next to impossible to be granted any relief from the lower court level. For one: After denial from the State Supreme Court Level, one would have to make a unfair choice to rather go into the Federal Court's with a Habeas Corpus or file for a Relief in Judgement, because of the tolling of "One Year" to file a 6.500 Motion in which the clock doesn't stop if a Habeas Corpus is file.

Secondly, the changing of the language in Rule 6.508(D)(b) which states that " an irregularity so offensive as to seriously affect the fundamental fairness, integrity, or public reputation of judical proceedings:" I have spoken to two Attorney's whom stated that they do not understand what it means and I don't understand it either. This change seems to only complicate matters even more.

Lastly, the 25 page minimum is nearly not enough room to litigate serious issues thoroughly and efficiently.

In closing, I ask the court to reconsider these changes that will ultimately make it virtuly impossible for people in my situation to find justice.

Thank you in advance, your time and consideration is greatly appreciated.
