Re: Court Rule No. 2003-47

Gentlemen,

It is hard to believe the Michigan Supreme Court would deprive a citizen who worked around asbestos material for years the right to a jury trial.

The asbestos companys knew for a period of time before it was public knowledge, that asbestos was harmful to the health of workers.

Many workers are experiencing health problems, myself included from being unknowingly exposed.

I feel the workers should have the right to compensation. Therefore, Please do not vote for the asbestos industry's proposed "Court Rule."

Thank You,

Gordon R. Switzer
