

## Minimum Standard Data – Juvenile Drug Court

Set Sec. 1078 of 2004 PA 224 states that each drug treatment court shall collect and provide data on each individual applicant and participant and the entire program as required by the State Court Administrative Office. The information collected must include a minimum standard data set developed and specified by the State Court Administrative Office. In accordance with this act, the State Court Administrative Office has prepared the following minimum standard data sets. The minimum standard data sets include the minimum data that must be reported to the State Court Administrative Office on an annual basis. The reported data will be used in preparing the annual legislative report regarding drug court performance, as mandated in Sec. 1078 of 2004 PA 224.

In accordance with 2004 PA 224, data must be collected and reported for all drug court applicants that were screened for drug court, even if the applicant was not accepted into the drug court program. Therefore, the minimum standard data that follows is broken into two sets; one set for screening and one set for case management data relevant to accepted participants. This document provides descriptions and valid values for each of the variables in the minimum standard data sets. This information can be entered in the Excel spreadsheet that accompanies this document.
