

## **Court Collections Program Models**

### **Compliant**

- Must consist of components 1 through 7

### **Optional**

- In addition to components 1 through 7, implementing components 8, 9, and/or 10.

These are the minimum requirements for each model. A program that implements anything less than components 1 through 7 is considered Noncompliant. Court collections programs may have additional components not included in these models.

Regardless of collections rates, a court that has implemented a Compliant collections program is in compliance with the Court Collections Program Requirements. A court that does not meet the requirements for a Compliant collections program is not in compliance with the Court Collections Program Requirements and must prepare and submit an action plan to become compliant.

Compliance with the Court Collections Program Requirements means that a court has adopted a program that includes the required components. Compliance does not require that a court implement each detail listed below each component. Rather, the details provide additional information about the component or concrete examples of ways a court may fulfill the listed requirement. Each court, in consultation with the SCAO, should assess the court's needs and abilities, and implement a program that maximizes collections efforts without necessitating additional staff or financial resources.
